

10 10 00 INFORMATION SPECIALTIES

10 11 00 Visual Display Boards

1. Glassboards
 - a. When possible, glass boards are preferred to whiteboards.
 - b. Glassboards may be mounted using either stand-offs or cleats.
 - c. In small collaborative areas, mobile glassboards may also be used.
2. Wall-mounted Whiteboard Standard
 - a. Claridge LCS Markerboard with projection-friendly white porcelain enamel steel writing surface; 5/8" face trim on 3 sides with full-length 2.5" marker tray in satin anodize finish; angle clip hangers.

3. Features
 - a. Marker trays are to be a component of the board itself, either detachable or integrated; marker trays built into the wall or other architectural component are not permitted.
 - b. Surrounds and frames for whiteboard and glassboards can be used to deter writing off the surface.
4. Installation
 - a. In classroom settings, boards must be mounted at 36" H A.F.F. The boards must be at least 48" tall unless it interferes with a projection screen. Length will vary based on the available space.

- b. In office settings, boards may be mounted at other heights and specified in different sizes per request.
